

Appendix A

Individual Contribution & AI Usage Report

Each member should describe their contribution and specify any AI tools used, such as ChatGPT, Deepseek, Copilot, code generation tools, or data analysis assistants. Provide details on how AI supported the work, such as summarization, debugging, ideation, or automation.

Student Name	Role/Responsibility	Contribution Details	Use of AI Tools (if applicable)
Nicholas Smith	Code development, ERD, report writer	Constructed ERD, SQL coding and debugging for DML, DDL. Query testing, report writing and document organization	Used AI for debugging and optimization
Lucas Roma	Code development, Model building	Designed Python ML models for testing data, SQL coding for DQL, DML, DQL and created the README file	Used AI for debugging , optimization , organization , data generation
Santiago Hernandez Riano	Report writer, modeling building	Assisted with developing model, writing for model description	Used AI for debugging and optimization,
Ricardo Werchez De Paiva	Code development, ERD	SQL coding for DDL, developing schema design	Used AI for debugging and data generation
Carlos Henrique Freitas	Report Writer	Report writing for database description & business application,	

		document organization
